ABOUT ME

Full-stack, full-ownership software engineer building AI-native products from idea to production, from interface to infrastructure. I've built React, TypeScript and Python applications, deployed AWS services, and managed Kubernetes clusters. I ship fast and iterate with customers to deliver products they love. Chasing steep learning curves since forever: math olympiads, coding, and now AI. Happiest at startups where ambitious teams work hard on challenging problems.

WORK

Engineering Intern

ECOM Chaco S.A.

Argentina

Jun 2025 - Nov 2025

- Intense internship at a software agency, reporting to senior engineers.
- Became a key contributor in platform engineering within three months, managing 100+ apps with tools like kubectl, Argo CD, Vault, Prometheus, and Grafana.
- Migrated 50+ live services with thousands of users to Kubernetes.
- Built self-service infrastructure workflows that enabled 20+ developers to ship faster.
- Reduced deployment times from hours to minutes via CI/CD improvements and script automations.
- Created a data pipeline with Python and SQL to prove team impact with data-driven insights.

Undergraduate Research Assistant

National Technological University (Resistencia Campus)

Argentina

Apr 2023 – Nov 2025

- Collaborated on three interdisciplinary research projects spanning science, security, and education.
- Co-authored and published two papers at national academic conferences.

SKILLS

AI: Claude Code, agent skills, OpenAI API.

Frontend: TypeScript, React, Next.js, TailwindCSS.

Backend: Node.js, Python, Go, SQL, Supabase.

Platform: Docker, Kubernetes, Linux, Terraform, AWS (SAA Certified).

PROJECTS

LLM Game

2026

A game where you question three AI crewmates, each with different alibis, to find the traitor.

React Native Mobile App

2025

Launched Elepad on the Play Store: a full-stack app that connects families with their senior relatives.

Open-Source Chrome Extension

2024

A JavaScript browser extension for my former university's website with 100+ weekly active users.

EDUCATION

National Technological University, Argentina

2021 - 2026

B.S. in Information Systems Engineering

Graduated with academic honors (second highest GPA in cohort)

Digital House, Argentina

2021 - 2022

Certified Tech Developer
