ABOUT ME

I'm an AI-native, product-minded software engineer experienced in building full-stack applications and scalable cloud-native platforms. I work across the entire tech stack to deliver scalable, maintainable systems that push the business forward. I'm a generalist that takes end-to-end ownership of complex problems to deliver practical solutions. I genuinely thrive working with ambitious teams in fast-paced environments building high-impact products.

EXPERIENCE

Engineering Intern

ECOM Chaco S.A.

Argentina

Jun 2025 - Nov 2025

- Ramped up to senior-level productivity within three months working across developer tooling and platform engineering.
- Built an entire full-stack app as the internal portal of our infrastructure self-service platform.
- Implemented a data pipeline with Python to collect and aggregate devops performance metrics, enabling engineering teams to prove their business impact with data-driven insights.
- Improved CI/CD pipelines with Argo CD and built self-service Kubernetes tooling, reducing deployment times from days to minutes across four teams.
- Migrated over 50 live services used by thousands of users to Kubernetes.
- Deployed monitoring solutions with Prometheus and Grafana, improving observability for 100+ apps.

Undergraduate Research Assistant

National Technological University (Resistencia Campus)

Argentina

Apr 2023 – Nov 2025

- Collaborated on three interdisciplinary research projects spanning science, security, and education.
- Contributed to a research project developing a security control framework for IoT networks.
- Co-authored two papers and presented them at national academic conferences.

SKILLS

Software: React, TypeScript, Node.js, HTML, Tailwind CSS, Turborepo, Python, Go.

DevOps: Git, Linux, Docker, Kubernetes, Terraform, AWS.

Databases: SQL, PostgreSQL, Supabase, MongoDB, Redis.

Soft Skills: Leadership, ownership, adaptability, authenticity, communication, problem-solving.

PROJECTS

“Elepad” React Native App

2025

Built and launched an app on the Google Play Store. Led a team of 5 engineers to ensure delivery on time.

“Michiutilidades” Chrome Extension

2024

Created an open-source browser extension with 100+ weekly active users for my former university.

EDUCATION

National Technological University, Argentina

2021-2025

B.S. in Information Systems Engineering

Graduated with academic honors (second highest GPA in cohort)

Digital House, Argentina

2021-2022

Certified Tech Developer
