ABOUT ME

Full-stack, full-ownership software engineer building AI-native products from idea to production, from interface to infrastructure. I've shipped React, TypeScript and Python applications, managed Kubernetes clusters, and deployed AWS services. I ramp up quickly on new problems, iterate super fast, leverage AI, and stay close to customers to deliver products they love. Happiest at fast-paced startups where small teams work on high-stakes problems.

EXPERIENCE

Engineering Intern

ECOM Chaco S.A.

Argentina

Jun 2025 - Nov 2025

- Quickly ramped up to become a key contributor in platform engineering within two months.
- Contributed to an internal full-stack platform that enables infrastructure self-service for developers.
- Implemented a data pipeline with Python and SQL to collect and aggregate DevOps performance metrics, enabling engineering teams to prove their business impact with data-driven insights.
- Improved CI/CD workflows with Argo CD and built self-service Kubernetes tooling, reducing deployment times from hours to minutes across four teams.
- Migrated over 50 live services used by thousands of users to Kubernetes.
- Deployed monitoring solutions with Prometheus and Grafana, improving observability for 100+ apps.

Undergraduate Research Assistant

National Technological University (Resistencia Campus)

Argentina

Apr 2023 – Nov 2025

- Collaborated on three interdisciplinary research projects spanning science, security, and education.
- Co-authored and published two papers at national academic conferences.

SKILLS

Software: React, TypeScript, Python, Go, Claude Code.

DevOps: Linux, Docker, Kubernetes, Terraform, AWS (SAA Certified).

Databases: SQL, PostgreSQL, Supabase, Redis, NoSQL.

Soft Skills: Ownership, adaptability, agency, communication, authenticity.

PROJECTS

Elepad: React Native Mobile App

2025

Launched a full-stack mobile app on the Google Play Store, taking it from product design to deployment.

Michiutilidades: Chrome Extension

2024

Created an open-source browser extension with 100+ weekly active users for my former university.

EDUCATION

National Technological University, Argentina

2021-2025

B.S. in Information Systems Engineering

Graduated with academic honors (second highest GPA in cohort)

Digital House, Argentina

2021-2022

Certified Tech Developer
