ABOUT ME

I'm an AI-ready, product-minded software engineer experienced in building full-stack applications and managing cloud-native infrastructure. I work across the entire software lifecycle applying DevOps fundamentals to deliver scalable, maintainable systems. I'm a generalist that takes end-to-end ownership of complex problems to deliver practical, well-designed solutions. I thrive working with high-performing teams in high-stakes environments building high-impact products.

EXPERIENCE

Engineering Intern

ECOM Chaco S.A.

Argentina

Jun 2025 - Nov 2025

- Joined the DevOps team to migrate over 50 services to a Kubernetes infrastructure.
- Built a full-stack app as the internal portal of our infrastructure self-service system.
- Implemented a data pipeline to collect and aggregate devops performance metrics, enabling engineering teams to prove their business impact with data-driven insights.
- Improved CD pipelines and built self-service Kubernetes infrastructure tooling, reducing deployment times from days to minutes across four teams.
- Deployed monitoring solutions with Prometheus and Grafana, improving observability for 100+ apps.

Undergraduate Research Assistant

National Technological University (Resistencia Campus)

Argentina

Apr 2023 – Nov 2025

- Collaborated on three interdisciplinary research projects spanning science, security, and education.
- Partnered with a chemical engineering research group and applied data science techniques to predict key parameters affecting water treatment efficiency.
- Contributed to a research project developing a security control framework for IoT networks. Co-authored two papers and presented them at national academic conferences.

SKILLS

Software: React, TypeScript, Node.js, HTML, CSS, Go, Python.

DevOps: Git, Linux, Docker, Kubernetes, AWS.

Soft Skills: Leadership, ownership, adaptability, authenticity, communication, problem-solving.

PROJECTS

“Elepad” Mobile App

2025

Developed and launched an open-source React Native app on the Google Play Store to help families stay connected with elderly relatives. Led a team of 5 engineers to ensure delivery on time.

“Michiutilidades” Chrome Extension

2024

Developed an open-source browser extension with 100+ weekly users on the Chrome Web Store, enabling students to view their GPA on the university's academic platform and customize their UI.

EDUCATION

National Technological University, Argentina

2021-2025

Information Systems Engineering

Graduated with academic honors (second highest GPA in cohort)

Digital House, Argentina

2021-2022

Certified Tech Developer
